9. CHEMICAL/DG/ISO TANKS

Chemicals are substances that have been extracted from natural sources or synthesized in a laboratory. They are used in a wide variety of industries, including manufacturing, agriculture, and construction.

Some common types of chemicals include:

· Acids, Bases, Solvents, Pesticides, Fertilizers, Paints, Adhesives & Explosives

Dangerous goods (DG cargo)

Dangerous goods (DG cargo) are substances that pose a risk to safety during transportation. DG cargo is classified into nine different classes, depending on the type of hazard it poses.

DG cargo include:

- Explosives
- Gases
- Flammable liquids
- Flammable solids
- Oxidizing substances
- Toxic substances
- Radioactive materials
- Corrosives
- Miscellaneous dangerous substances

ISO tanks

The safe transportation of chemicals/DG cargo/ISO tanks is essential. There are a number of regulations in place to govern the transportation of these materials. It is important for shippers, carriers, and other logistics providers to comply with these regulations.

Chemicals/DG cargo/ISO tanks are essential for many industries.

10. BUYER CONSOLIDATION

Buyer consolidation is a logistics strategy that combines multiple less-than-container load (LCL) shipments from the same buyer into a single full-container load (FCL) shipment. This can be a more cost-effective and efficient way to ship goods, especially for buyers who are ordering from multiple suppliers in the same region.

11. WAREHOUSING & DISTRIBUTION

We as Warehousing Agents provide high level professional warehousing services and care that is the assurance of the safe arrival of your product anywhere, anytime.

Through our integrated inventory management system, we not only provide control on a worldwide basis but also allow customers to supplement and redistribute cargo. This approach reduces cycle time while assuring constant availability of product. Be carefully selecting a warehousing and distribution provider, businesses can ensure that their goods are stored and moved efficiently, which can lead to reduced costs, improved customer service, and increased sales.

12. MULTIMODEL & NVOCC

Multimodal transportation is the movement of goods using two or more modes of transportation, such as truck, rail, air, and sea. **NVOCC** stands for Non-Vessel Operating Common Carrier. It is a type of freight forwarder that acts as a carrier, but does not own or operate any vessels.

NVOCC typically contract with vessel operators to book space on their ships. They then consolidate shipments from multiple shippers and arrange for transportation from the point of origin to the point of destination.
